

A reusable observation brief

This is an original sample document for exploring linked evidence.
It contains no copied photographs, logos, or handbook illustrations.
Its text and vector artwork are dedicated to the public domain
under CC0 1.0 Universal.

MEASURE

Keep units visible

LOCATE

Preserve the timestamp

EXPLAIN

Link back to the source

Try selecting this passage in the PDF:
Every observation needs a source and a date.
The same text appears in the extracted Markdown view.

Read the evidence in context

A measurement needs a unit, a time period, and a source.

A map snapshot needs a timestamp and coordinate conventions.

An image needs a caption that separates observation from inference.

Keeping these details together makes a briefing easier to check.

MEASURE

Keep units visible

LOCATE

Preserve the timestamp

EXPLAIN

Link back to the source

These are demonstration statements, not operational advice.

External datasets in this collection retain their own reuse terms.

Read REUSE.md and sources.json before redistributing the folder.
